

# Canbio®

Pet tooth & mouth refresher

Companion animals have different feeding habits and are given different food. When they eat, they accumulate soft materials like minerals, organic materials, food and serum with saliva forming dental plaque, etc. These accumulations become hard and adhere to the teeth. These hard developments become spots of pathogenic bacterial growth leading to dental tarter. Bad breath or Halitosis is a social taboo for companion animals and is the advanced stage of periodontal disease.

Tartar appears yellowish to brown on the surface of the tooth or near the gum. These bacterial depositions cause inflammations of the gums called gingivitis. This results in bleeding. When this condition worsens it leads to periodontal disease, inflammation, pain and tooth loss, which can result is poor eating habits of companion animals.

Pet health concerns are almost similar to human which include periodontal disease.

# Canbio®

Pet tooth & mouth refresher

**Canbio®** is a biological solution to periodontal disease for companion animals. **Canbio®** is a free flowing powder containing beneficial bacteria which multiply and replace the odour causing bacteria in dogs and cats.

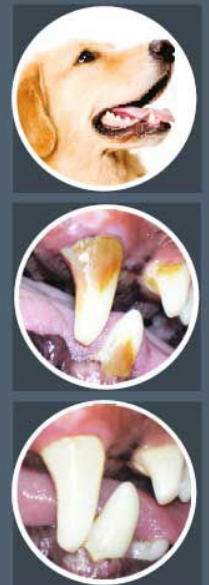

The bacteria in **Canbio®** are capable of producing enzymes that safely clean the teeth and whitens pet tooth. Therefore the dog or cat doesn't require brushing.

## Indications

- Dental Plaque
- Tartar
- Gingivitis
- Periodontal disease
- Teeth loss
- Halitosis

## Advantages of Canbio®

- Protects teeth from Halitosis condition
- Cleans teeth (Tatar accumulation)
- Whitens teeth
- Refreshes breath (cures bad odour)
- No brushing required
- No side effects

## Composition (Each 100 g contains)

<i>Streptococcus</i> sp ABPL 157	4.2 g (1.5x10 <sup>9</sup> /g)
<i>Streptococcus faecalis</i> T - 110	1.2 g (1.5x10 <sup>9</sup> /g)
Excipients	q.s

**Canbio®** offers a chemical free, simple solution without any side effects to the pet animal

**Dosage:** 5 gms per meal twice a day

**Animal Feed Supplement -  
Not for Human use. For Animal use only**

**Shelf life**

Best before 18 months  
from the date of manufacture
